

## Customizing Progress Developer Studio for OpenEdge

Gunnar Schug, VP Development, proALPHA Software AG

## Customizing – why???

- Automate recurrent tasks
  - Program headers
  - Code fragments
- (Re-)use your ABL based development tools
- Converge development process and development tools

## Customizing – how???

proALPHA

Customizing PDS

developer

## History / Milestones

**1994**

First **proALPHA**® Version

**1992**

Foundation of **W. Ernst Informatik GmbH**

**1996**

Foundation of **sales offices** in Germany

**1998**

Beginning of **internationalization**;  
USA, France, Hungary, Austria

**2005**

Foundation of **proALPHA**  
Poland

**2003**

Foundation of  
**proALPHA Consulting AG**

**2010**

Member of the Software  
Cluster funded by the German  
Federal Ministry of Education  
and Research (BMBF)

**2013**

Milestone in software  
development:  
**proALPHA 6.1** released

**2008**

Local presence in  
Germany with  
9 subsidiaries

## proALPHA – Partner for Small and Medium Sized Enterprises

<b>Product:</b>	Standard software proALPHA®	
<b>Services:</b>	IT consulting, project management, implementation, seminars, maintenance, support and hotline	
<b>Target market:</b>	Small and medium-sized industrial, trade and service enterprises	
<b>Figures:</b>	Customers	1,700
	Revenue 2012/2013	58,8 million €
	EBIT	10.8 million €
	Employees (as of 07/2013)	> 580
<b>Board of management:</b>	Leo Ernst	Corporate development
	Werner Ernst	Technology strategy
	Jürgen Brand	Finances
	Markus Klahn	Sales
	Matthias Kläsener	Technology and consulting
<b>Supervisory board:</b>	Dr. W. Wawrzinek	Lawyer and auditor in Hamburg
	Jan-Christopher Kling	Tax advisor and auditor in Kaiserslautern
	Prof. Dr. H. Müller-Merbach	TU Kaiserslautern
	Prof. Dr. H.-O. Günther	TU Berlin

Template  
(macros)

## Out of the box customizing options in PDS Startup routines

- Use your existing (ABL-) Framework in PDS
- Just place file “\_idestartup.p” in propath
- Start your framework (persistent procedures, OOABL services, etc.)
- Don't “wait-for” anything, you'll have to return from that procedure
- Optionally subscribe to “oeide\_event“

## Demo

## Out of the Event subs

- Best place: \_ide
- Some events:
  - Op
  - Be
  - Project-startu
  - Full list in onli

```

151 procedure oeide_event:
152 /* Description -----*/
153 /* -----*/
154 /* Event handler for OEA-Events
155 /* -----*/
156 /* Notes -----*/
157 /* -----*/
158 /* -----*/
159 /* -----*/
160 /* Parameters -----*/
161 /* -----*/
162 /* <none>
163 /* -----*/
164 /* Examples -----*/
165 /* -----*/
166 /* -----*/
167 /* -----*/
168 /*-----*/
169
170 define input      parameter pcEventName  as character  no-undo.
171 define input      parameter pcProjectName as character  no-undo.
172 define input      parameter pcProgramName as character  no-undo.
173 define input      parameter pcEventData  as character  no-undo.
174
175 /* Variables -----*/
176 /*-----*/
177
178 define variable cBCR_Connection_Obj as character  no-undo.
179
180 /* Buffers -----*/
181 /*-----*/
182 /*-----*/
183 /* Processing -----*/
184 /*-----*/
185
186 /* If project is closed, we deactivate the current session
187 /*-----*/
188 if pcEventName = 'Project-ShutDown':U then
189 do:
190   cBCR_Connection_Obj = pACCConnectionSvc:prpcBCR_Connection_Obj.
191   pACCConnectionSvc:Deactivate(cBCR_Connection_Obj).
192   pACCConnectionSvc:Disconnect(cBCR_Connection_Obj).
193   pACCConnectionSvc:Shutdown().
194 end.
195
196 end procedure. /* oeide_event */
197
198
    
```

here.

## Out of the box customizing options in PDS Custom project types

- Ability to create a custom folder structure
- not used by proALPHA → not much experience

The screenshot shows the Eclipse IDE Preferences dialog with the 'Progress Op' category selected. The main area displays XML configuration for a custom menu entry. The configuration includes defining a menu label, an action set, and several extension points for perspective, commands, bindings, and actions.

```

<?xml version="1.0" encoding="UTF-8" standalone="no" ?>
<plugin>
  <menu label="Extensibilit&y" id="extensibilitymenu">
    <groupMarker name="slot1"/>
  </menu>
  <action label="my first Menu Bar entry"
    id="com.openedge.pdt.extensibility.user.action28721919" style="push"
    menubarPath="extensibilitymenu/slot1" icon="icons/oelogo16.gif"
    definitionId="com.openedge.pdt.extensibility.user.action28721919"
    class="com.openedge.pdt.text.actions.resource.LaunchABLAAction">
    <enablement>
      <or>
        <objectClass name="org.eclipse.core.resources.IResource"/>
        <objectClass name="org.eclipse.jface.text.ITextSelection"/>
      </or>
    </enablement>
  </action>
</actionSet>
</extension>
<extension point="org.eclipse.ui.perspectiveExtensions">
  <perspectiveExtension targetID="com.openedge.pdt.text.ProgressPerspective">
  </perspectiveExtension>
</extension>
<extension point="org.eclipse.ui.commands">
  <command id="com.openedge.pdt.extensibility.user.action28721919" name="my first Menu Bar entry"/>
</extension>
<extension point="org.eclipse.ui.bindings"/>
<extension point="com.openedge.pdt.text.actions">
  <actionInfo commandId="com.openedge.pdt.extensibility.user.action28721919">
    <commandParameter id="programName" value="c-win.w"/>
    <commandParameter id="launchPersistent" value="false"/>
    <commandParameter id="programParameters" value=""/>
    <commandParameter id="configurationName" value=""/>
    <commandParameter id="sendProgramName" value="false"/>
  </actionInfo>
</extension>
<extension point="org.eclipse.ui.newWizards"/>
<extension point="com.openedge.pdt.text.wizard"/>
<extension point="org.eclipse.wst.common.project.facet.core.facets"/>
<extension point="com.openedge.pdt.project.OEProjectType"/>
<extension point="org.eclipse.wst.common.project.facet.ui.images"/>
<extension point="org.eclipse.wst.common.project.facet.core.presets"/>
<extension point="org.eclipse.wst.common.project.facet.ui.wizardPages"/>
</plugin>

```

developer

## Disclaimer

The following part of the presentation makes use of undocumented and unsupported features of Progress Developer Studio.

All things are subject to change (believe me – they will change).

If you use any of the following techniques, you might be enforced to re-engineer things when migrating to a new Progress version.

## Requirements

- Eclipse (hence Progress Developer Studio) is developed in Java
- → if customization editor is not enough, you'll need to learn Java
- Best practice for use Eclipse extension points (or develop own plug-ins) is pre-build package “Eclipse for RCP and RAP Developers”
- Use the same version as Progress Developer Studio
- Run “integrateArchitect.bat –install” to install PDS plugins in your Java development environment
- Write whatever plugin that you need...

## Interesting (Progress-) classes

- ... we don't want to improve Java development – we'd like to customize Progress Developer Studio
- → some Progress classes and methods might be of interest
- `com.openedge.pdt.text.Oeutil` – useful tools
  - `getProjectSelection` returns „current“ project
  - `isOpenEdgeProject` returns true if given project is an OpenEdge project (and thus can execute ABL commands)

## Interesting (Progress-) classes

- `com.openedge.core.runtime.ProgressCommand`
  - Various constructors to setup a command object
  - `waitForResult` method to stop processing until AVM has finished
  - `getCompletionStatus` („*STATUS\_COMPLETED*“, „*STATUS\_FAILED*“, etc.)
- `com.openedge.pdt.project.OEProject`
  - `.getRuntime().runProgressCommand` executes Progress Command object
  - `.getPropath` to access propath

## Interesting (Progress-) classes

- `com.openedge.pdt.project.OEPropertyStore` & `com.openedge.pdt.project.properties.IOEProjectProperties`
  - Update OpenEdge project properties, e.g.
  - `IOEProjectProperties.P_STARTUP` – project startup command
  - `IOEProjectProperties.P_RCODEPATH` - .r-code directory
  - Etc.

## Interesting (Progress-) classes

- Remember
  - All these class names and methods are subject to change
  - They are not documented and hence you can't be sure that they are stable between different versions
  - Ask your Progress contact if you have questions
  - Vote with me for making them “official”

## Further information

- My talks “Online Exchange 2010 - Session 1015 - Extending OpenEdge Architect” and “DEV07: Extending OpenEdge Architect” Pug Challenge Europe 2010
- Progress Exchange 2013 Workshop “Progress Developer Studio for OpenEdge”
- Progress OpenEdge Documentation „Progress Developer Studio for OpenEdge Online Help”, chapter 14 “Introducing Progress Developer Studio for OpenEdge customization”
- PSDN “OpenEdge Architect: Working with Custom Templates” (<http://communities.progress.com/pcom/docs/DOC-16387>)

## Free and easy to use (and install) products to support your development process – my personal selection

- Client side tasks manager: e.g. MyLyn (eclipse built-in)
- Bugtracking system: e.g. Mantis (<http://www.mantisbt.org/>)
- Version control system: e.g. Subversion
  - Server: e.g. VisualSVNServer <http://www.visualsvn.com/server/>
  - Client:
    - Windows Explorer Client: e.g. TortoiseSVN <http://tortoisesvn.tigris.org/>
    - Eclipse-Client: e.g. Subclipse <http://subclipse.tigris.org/>
- Adapters available for integration (e.g. “MyLyn-Mantis-Connector”, “Subclipse Integration for Mylyn”, etc.)

## Customizing of Progress Developer Studio – Questions?

Gunnar Schug, VP Development, proALPHA Software AG
